

The Training process of PROMITHEAS - 4 project is addressing to academics, national market stakeholders, ministerial bodies, researchers, PhD candidates, relevant to Climate Change Policy and mixtures and to Mitigation / Adaptations thematics, mostly coming from Black Sea and Central Asia regions.

The process is divided into two (2) parts.

Part A. was an **E-class**, where participants attended seven (7) modules regarding the Climate Change Policy Mixtures, lasting four (4) months (March - June 2012). At the end of this period, there was a week of examinations.

At the beginning of e-class, the expected number of participants was 24 from the 12 beneficiary countries of the project.

However, the number of applicants who registered for the lessons reached the 110, from European Union, Black Sea, Africa, USA and Central Asia regions .□

During the period of 4 months, participants were submitting assignments for each module and had the opportunity to discuss any questions with their Instructors. The topics covered were the Climate Change policy Mixtures and the participants familiarized with the **LEAP model** and the **AM**

S method

, important tools for anyone interested to work on climate change policies.

At the end of the e-class examinations, 19 participants met all the standards of the Instructors, in such a way, that are considered as "Succeed". However, many from the participants who failed to pass all the modules had great performance in some of them.
