

Innovative Methods for improving and promoting Climate services in the region of Southeast Europe

This project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement No 101056933

Climate services

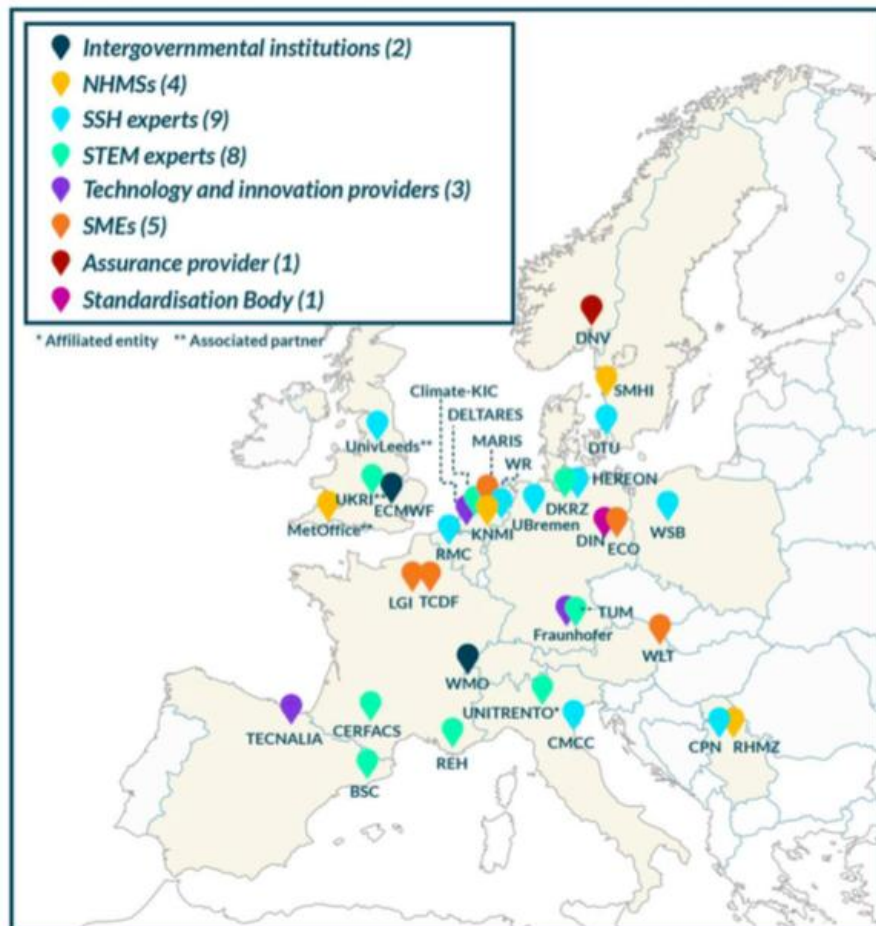

- provide climate information
- help individuals and organizations make climate smart decisions, manage risks and realise opportunities

Climateurope2 aims to develop future equitable and quality-assured climate services to all sectors of society by:

- **Developing standardisation procedures for climate services**
- **Supporting an equitable European climate services community**
- **Enhancing the uptake of quality-assured climate services to support adaptation and mitigation to climate change**

Consortium

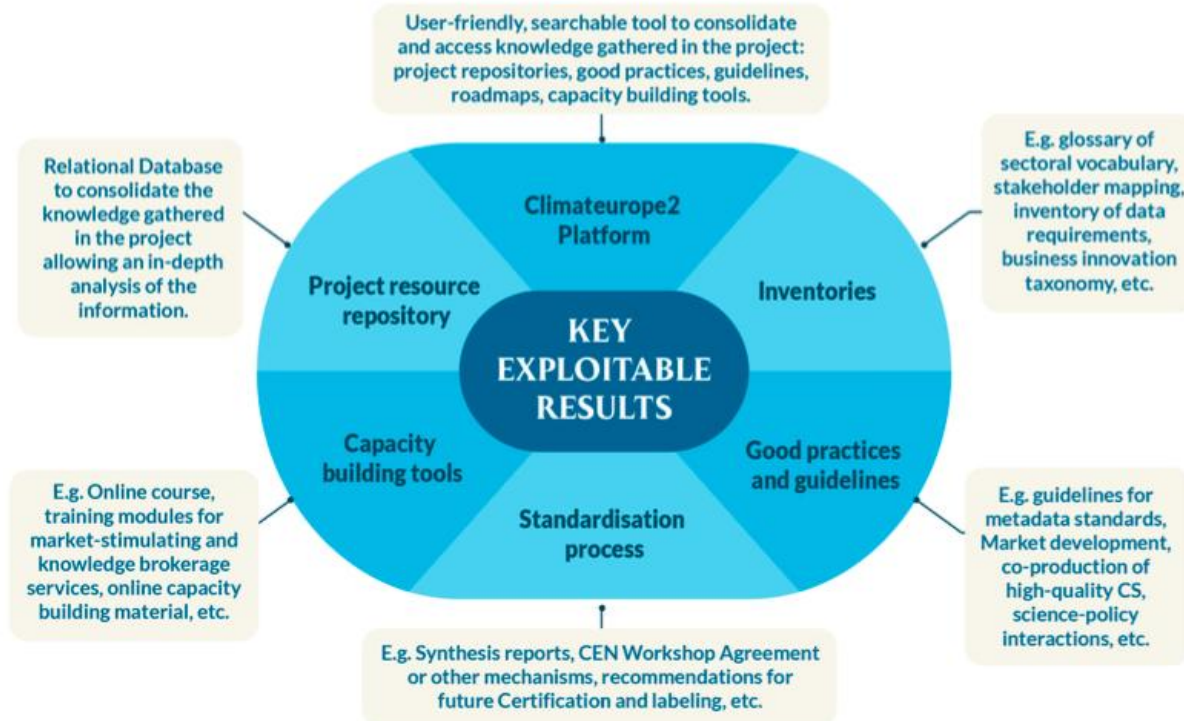

33 partners (3 associated)
and 13 countries

Community and audience

Exploitable results

Objectives and structure

Standardising

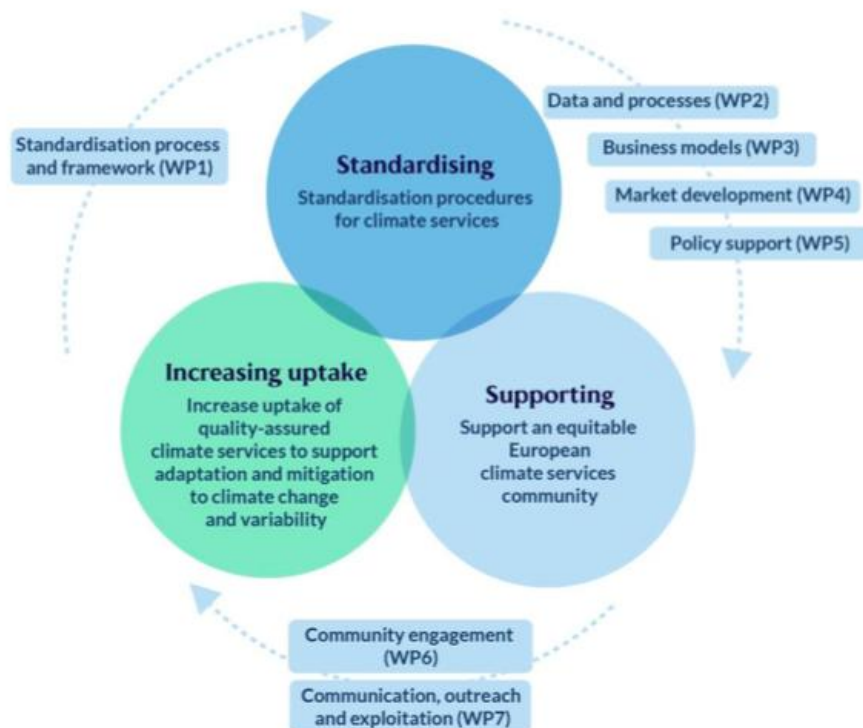

Development of **standardisation** procedures for climate services

Supporting

Support of an equitable European climate services community

Increasing uptake

Enhancement of the **uptake** of quality-assured climate services to support climate adaptation and mitigation

WHY TO JOIN THE CLIMATEUROPE2 NETWORK?

Climateurope2 will support the development of future equitable and quality-assured climate services of greater value to society, which will provide trustworthy, user-relevant and usable information.

For that, we need to involve all the actors in the climate services value chain. We will develop a network across Europe to improve the connection, engagement and promotion of European climate service activities.

**JOIN OUR
NETWORK**

In our network you will be able to:

- **Engage** with the community of climate services through the interactive Climateurope2 Platform
- **Participate in the discussions** and co-produce knowledge on climate services and the standardisation of their components with the aim to reach consensus with the different actors involved
- **Have direct access to information** about good practices, recommendations, vocabularies and standardisation processes of the climate services value chain as well as capacity-building materials
- **Be informed about activities** bringing the network together, including festivals, webstivals, a roadshow, a webinar series, business breakfasts and much more
